

NEW!

Conductor™

PRINTER AUTOLOADER

Automate your CD-R and DVD-R printing with the new Conductor Printer Autoloader from Primera Technology.

Instead of manually loading and printing discs one at a time, Conductor's advanced robotic mechanism automatically loads and unloads them from any FARGO® or Primera® ink-jet or thermal optical disc printer. Conductor has a 50-disc capacity, making the task of printing large numbers of discs fast, easy and hands-free.

PRIMERA
TECHNOLOGY, INC.

Loading discs one at a time into a CD printer is a time-consuming and inefficient process, especially if you need 50, 100 or more discs printed. But now you can easily and inexpensively automate the process with the new Conductor Printer Autoloader.

SIMPLE TO OPERATE, PROVEN RELIABILITY

Set-up and operation is easy. Just set a Primera ink-jet or thermal printer onto the integrated printer stand. Connect one control cable and apply power. Send a print file as you normally would from virtually any Windows graphics program along with the number of discs you need printed. Then, walk away and let Conductor's precision robotics move up to 50 discs per batch into and out of your printer – automatically!

EASY TO UPGRADE

As your needs change, Conductor can be upgraded at any time to include a CD-R or DVD-R drive along with Windows®-based software for mastering and disc duplication. This turns your Conductor into a complete record and print solution.

TWO PRINTING OPTIONS

Composer comes ready for the integration of a Primera Technology CD Printer. You can print text, graphics, logos and even full-color photos directly onto the top surface of the disc.

Both ink-jet and thermal printers are available, so you can choose which one works best for you. Select the Signature III® CD Color Printer for 1200 x 1200 dpi, full-color printing onto printable-surface discs. Or choose the Inscripta™ Thermal CD Printer for durable, scratch- and smudge-resistant, completely waterproof printing onto standard discs.

Conductor works with any Signature CD Color Printer or Primera's new Inscripta Thermal CD Printer (shown here).

Sample CD output from Primera's thermal and ink-jet CD printers.

MODEL:

Conductor Printer Autoloader

ROBOTICS:

Controlled by CD printer and printer driver software

DISC CAPACITY:

Up to 50 discs per batch, input and output

SUPPORTED PRINTERS:

Signature, Signature II, Signature III CD Color Printers and Inscripta Thermal CD Printer (manufactured by FARGO or Primera Technology)

MINIMUM SYSTEM:

Pentium® II/III or Celeron® processor (or equivalent) at 233 MHz or higher, 32MB RAM, one free ECP parallel printer port, 2MB available hard drive space

OPERATING SYSTEMS:

Windows 95/98/NT/ME and Windows 2000

POWER REQUIREMENTS:

100-240 VAC, 50/60 Hz, 60 watts

WEIGHT:

8.9 lbs. (4.04 kg)

DIMENSIONS:

16.625"W x 10"H x 10.125"D
(422mmW x 254mmH x 257mmD)

CERTIFICATIONS:

Emissions – FCC Class B, CE
Safety – TUV-GS, cTUVus, CE

WARRANTY:

One year return-to-depot

Conductor is from Primera Technology, an industry-leading manufacturer of optical disc duplication and printing equipment. Its management is responsible for the design and manufacture of over one million thermal transfer, dot-matrix and ink-jet printers, including the popular Signature III CD Color Printer. Primera Technology CD-R/DVD-R products are distributed worldwide in over 80 countries.
